Complete the Picture

Sony® Digital Imaging Accessories can make the difference between a missed opportunity and a treasured memory. When your son's playoff game goes into extra innings, you'll really appreciate having a spare battery. When you're touring Rome, you'll thank yourself for getting a larger memory card. When you sight a Great Blue Heron in the Everglades, you'll be happy to have the extra reach of a telephoto conversion lens. Sony Accessories prove that little things mean a lot.

G **G Lenses:**

The large-aperture G Lens series brings together a wealth of advanced technology to provide you with an exceptionally refined level of optical performance. Its aspherical lens elements improve lens performance; ED (Extra-low Dispersion) glass elements minimize the chromatic aberrations that occur at large apertures; and the circular aperture makes smooth, beautiful defocusing possible. The resulting difference in quality is clear to see... and clearly breathtaking.

Microphones/Lights

Enhancing sight and sound.

Professionals know that clear sound is an essential component of good video. That's why the pros turn to Sony microphones. And because light is indispensable to photography, Sony offers a comprehensive range of video lights, α camera flashes and flash accessories.

Communicate with your subject

Bluetooth® Wireless Microphone

ECM-HW2 SPPG: $229.99

• Record high-quality audio in your videos from up to 300ft (100m)* away — without wires
• Interactive Communication feature
 –Talk directly to your subject as you're recording
 –Record just your subject's voice or both of your voices
 –Earphone jacks in both microphone and receiver units (earphones included)
• Works with your camcorder's 5.1ch Mix-mode
• Compatible with most camcorders with Active Interface Shoe

*Actual distance may vary depending on user's conditions.

You can speak to the person you're recording and have the option of having your voice in the recording or not.

You can unobtrusively receive input from the camera man.

Zoom Microphone

ECM-HGZ1 SPPG: $69.99

• Powered and controlled by Handycam® camcorder with a unique Active Interface Shoe
• Zoom mode: Picks up sound in the direction the Handycam camcorder is zoomed
• Gun mode: Sharp sound is picked up from the object you focus on
• Mono microphone

Zoom Microphones:

Block out background sounds and focus your audio recording.

It can be frustrating trying to shoot videos in a crowd or other situation with a lot of background noise. That's because a camcorder's built-in microphone picks up sounds coming from all directions, turning a video's audio track into a garbled mess. But a Sony® Zoom Microphone narrows in on an intended subject, helping to minimize any extraneous sounds that could get in the way of a clear recording.

High-fidelity Stereo Microphone

ECM-HST1 SPPG: $99.99

• Powered and controlled by Handycam® camcorder with a unique Active Interface Shoe
• High-quality stereo audio
• User-selectable audio coverage: Select 90 degrees for concentrating on a single speaker, or 120 degrees for picking up group conversations

High-fidelity Stereo Microphone

ECM-MSD1 SPPG: $99.99

• Super quality audio sensitivity
• User-selectable audio coverage: Select 90 degrees for concentrating on a single speaker, or 120 degrees for picking up group conversations
• Requires VCT-S30L Cold Shoe Adapter (sold separately)

Bluetooth® Wireless Microphone

ECM-AW3 SPPG: $229.99

• Capture audio from up to 50m/150ft away — without wires
• Talk back-and-forth with your video subject even from a distance
• Plugs into the camcorder's MIC in and earphone jacks, freeing up the Active Interface Shoe for a video light or other compatible accessory

Shotgun Microphone

ECM-CG50 SPPG: $239.99

• Super quality audio and super cardioid directivity
• For high-end camcorders and cameras with MIC in jack
• Supplied general cold shoe for other camcorders and cameras[10]
• Reduces the amount of low frequencies through "Low cut" mode
• Power AA alkaline battery or camera's battery via MIC input jack

Portable Speaker*

RDP-CA1 SPPG: $69.99

• Circle Sound Technology with 360-degree speaker
• Powered via Active Interface Shoe (no add'l battery required)
• Sound Output: Approx. 2W

Effective ways to store and share.

As the megapixel count of digital cameras continues to increase — and home movies have gone from SD to HD — storage capacity has never been more important. That's why Sony offers Memory Stick PRO-HG Duo™ and SD/SDHC cards in capacities of up to 32GB.

Our card adapters, readers and cables help you share what you've stored.

Cyber-shot® cameras

Memories made amazing.

There's a world of difference between ordinary digital pictures and the images you'll capture with Sony Cyber-shot cameras. Our pocket cameras offer up to 20x zoom to get you far closer to your subject. Our Exmor® R image sensor captures beautiful images, even after dark. The Superior Auto mode automatically activates the appropriate camera functions for many shooting situations. Even the HD Movie modes are advanced, with available 1080/60p high-frame-rate shooting.

Handycam® camcorders and Bloggie® cameras

HD is just the beginning.

Ever since Sony created the world's first consumer camcorder, we've been driven to constantly extend, improve and reinvent our creation. It's a passion you can see in the latest models with built-in video projector. In the interchangeable lens NEX-VG20H. In our amazing digital recording binoculars. And in the Bloggie Live™ HD camera that wirelessly streams live video to the Internet. At Sony, we never stop redefining what a camcorder can be.
